

MATTHEW VOGAS

Product Engineer

hi@matthewvogas.com | matthewvogas.com | linkedin.com/in/matthewvogas | github.com/matthewvogas

Summary

Product engineer building since 16. I design, build and ship products end to end, then iterate with real users. Co-founder of Rosvelt, an AI agent workspace backed by angel investors. Led design and development of Index Fun with the former CEO of bitcoin.com, named one of Asia's top 10 web3 apps. Built for Sequoia-backed products with 500K+ users and for a Fortune 50 company.

Experience

Co-founder & Product Engineer

Mar 2026 – Present

Rosvelt

Remote

- Co-founded a product workspace where AI agents take tickets, then plan, code, test and open pull requests.
- Raised a round from angel investors; set up the US LLC.
- Lead product development and go-to-market, from user conversations to shipped features.

Technical Lead & Partner

2026

Mae de Agua

Remote

- Built the wellness MVP in 3 days, put it in front of real users, then rebuilt it as a native iOS app.
- Built a custom ElevenLabs voice companion.
- Worked with the former director of Microsoft Latam on product strategy.
- Shipped dynamic Apple Wallet passes that sync streaks, points and membership in real time.

Product Developer (Contract)

Oct 2024 – Sep 2025

Comcast Business

Chicago (Remote)

- Worked with the CTO of Nitel (acquired by Comcast) on a large-scale telecom platform migration for enterprise clients.

Product Developer & Designer (Contract)

Holdex

Hong Kong (Remote)

- Led design and development of Index Fun with Stefan Rust, former CEO of bitcoin.com; built ~80% of the app.
- Index Fun was named one of Asia's top 10 revolutionary web3 apps by Crypto Banter Magazine.
- Contributed to Ozean, Clearpool and Truflation, products with 500K+ users backed by Sequoia.

Software Developer

2022 – 2023

GoLabs

- Developer at a startup founded by an investor interested in Hoosling.

Co-founder

2021

Hoosling

Costa Rica

- Built a crypto crowdfunding platform for Latin America at 16.
- Received \$60–80K in VC proposals; ran user interviews and market validation.

Projects

- **Monako:** npm package of animated faces for AI agents; ~500 weekly downloads, ~3 KB gzipped, zero dependencies.
- **Lindora:** AI virtual try-on app (React Native).
- **Paxie:** prediction market that hides crypto UX behind email sign-in and embedded wallets.
- **Open-source design:** Figma designs with 40K+ downloads.

Skills

- **Product:** 0-to-1 MVPs, user research, validation, feedback loops, product design (Figma)
- **Full Stack:** TypeScript, React, Next.js, React Native, Svelte, Vue.js, Angular, Tailwind CSS / Node.js, Express.js, NestJS, Supabase, Firebase, PostgreSQL, GitHub Actions, Vercel
- **AI:** OpenAI, Anthropic, Google Gemini/Vertex AI, ElevenLabs, Deepgram, Hugging Face, Claude Code, Cursor, Codex, multi-agent workflows
- **Web3:** smart contracts, thirdweb, embedded wallets

Education & Awards

- **Self-directed:** 70+ courses on Platzi; MasterClass, Building Your Startup (Alexis Ohanian); sales training
- **3rd place,** National Lego Robotics Competition, Costa Rica
